PLEASE REJECT THE NAB'S PETITION 04-160. Here is why--

It is very important for us to have XM Radio's Instant Traffic & weather available because when traveling in other cities it is extremely helpful information.

It is also NOT easy to know/find what public radio stations are carrying this type of information while you are in these different cities. The information is not made readily available when renting a car. It is also not easy to find the information on a public radio station while you are trying to drive on the cities' roads which may be unfamiliar and you are trying to use the seek button on the car radio.

Since I'm paying for the service, I expect the convenience of hearing this type of information when I need it - not on some radio station locally on the 8's.

REJECT the NAB's petition 04-160
